How did the Fund perform last year and what affected its performance?

From inception through 4/30/25, RGTX had a NAV return of 13.95%. Since its inception, RGTX has experienced significant volatility. This volatility reflects the leveraged nature of the fund and the performance of its underlying asset, Rigetti Computing Inc.

What Factors Influenced Performance

The Fund's 2x leverage means that over periods longer than a day, the effects of compounding can lead to returns that deviate significantly from the expected 2x multiple, especially in volatile markets. High volatility in the underlying stock can exacerbate the compounding effects, leading to greater divergence from the expected performance over time.

Rigetti's stock performance in April 2025 was driven by its selection for a significant government initiative, a substantial investment from a strategic partner, and advancements in its quantum computing technology. However, financial results highlighted challenges in revenue generation, leading to stock volatility. Investors remain optimistic about Rigetti's long-term prospects in the quantum computing sector, but short-term financial performance continues to be a focal point.
