

## **Defiance Next Gen SPAC Derived ETF (SPAK)**

**December 28, 2020**

### **Supplement to the Summary Prospectus and Prospectus, each dated September 29, 2020**

*The section entitled “Principal Investment Strategies—Indxx SPAC & NextGen IPO Index” beginning on page 2 of the Summary Prospectus and page 8 of the Prospectus is replaced with the following:*

#### *Indxx SPAC & NextGen IPO Index*

The Index tracks the performance of the U.S.-listed common stock of Special Purpose Acquisitions Corporations (“SPACs”) and companies derived from SPACs. SPACs (also known as “blank check companies”) are companies with no commercial operations that are established solely to raise capital from investors for the purpose of acquiring one or more operating businesses (i.e., a SPAC-derived company).

To be eligible to be added to the Index, a security must be U.S.-listed, have a minimum total market capitalization of \$250 million, have a free float (i.e., the proportion of shares that are publicly available) of at least 10%; have a trading price of less than \$10,000; and meet minimum liquidity thresholds. To be eligible to be added to the Index, SPACs must have traded on 90% of the eligible trading days in the last 3 months, except that SPACs with a market capitalization of more than \$750 million are eligible if they have been listed for at least five trading days. Additionally, to be eligible to be added to the Index, SPAC-derived companies must be actively trading and must have traded for less than 2 years since completing a business combination with a SPAC.

Beginning in 2021, as of each reconstitution and rebalance of the Index, 60% of the weight of the Index will be allocated to SPAC-derived companies and 40% will be allocated to SPACs. Within each such category, constituents will be weighted based on their market capitalization, subject to a maximum 12% weight and minimum 0.5% weight for an individual constituent. Additionally, the aggregate weight for securities with a weight greater than 5% is limited to 45% at the time of each reconstitution and rebalance of the Index.

The Index is reconstituted annually after the close of business on the last trading day of each July and rebalanced quarterly after the close of business on the last trading day of each January, April, July, and October, although new SPACs and SPAC-derived companies that meet the Index’s eligibility requirements may be added on a “fast-entry basis” in between reconstitution dates. In addition to the annual reconstitution in July, new SPACs and SPAC-derived companies may be added to the Index on the last trading day of each month. Index constituents will be removed from the Index at the time of a reconstitution if they fail to meet the eligibility requirements.

As of December 23, 2020, the Index was composed of 70 constituents. The Index was established in 2020 and is owned and maintained by Indxx, LLC (the “Index Provider”). The Index Provider partnered with the Fund’s investment adviser to co-develop the methodology used to determine the securities included in the Index.

**PROSPECTUS**  
September 29, 2020

The U.S. Securities and Exchange Commission (“SEC”) has not approved or disapproved of these securities or passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the SEC, paper copies of the Funds’ shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the Funds’ reports from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to elect to receive shareholder reports and other Fund communications electronically.

You may elect to receive all future Fund reports in paper free of charge. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

## Defiance Indxx Junior Semiconductor ETF

### Investment Objective

The Defiance Indxx Junior Semiconductor ETF (the “Fund” or the “Semiconductor ETF”) seeks to track the total return performance, before fees and expenses, of the Indxx US Junior Semiconductor Index (the “Index”).

### Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold, and sell shares of the Fund (“Shares”). This table and the Example below do not include the brokerage commissions and other fees to financial intermediaries that investors may pay on their purchases and sales of Shares.

<b>Annual Fund Operating Expenses</b> ( <i>expenses that you pay each year as a percentage of the value of your investment</i> )	
Management Fees	0.45%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses*	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.45%</b>

\* Estimated for the current fiscal year.

### Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>
\$46	\$144

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

### Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to track the total return performance, before fees and expenses, of the Index.

#### *Indxx US Junior Semiconductor Index*

The Index is a rules-based index that consists of a portfolio of the U.S.-listed common stock of small capitalization (“junior”) companies belonging to the Electronic Production Equipment or Semiconductors industries as defined by the FactSet Revere Business Industry Classification Systems (“RBICS”) and that derive a significant portion of their revenue from one or more of the following activities (collectively, “Semiconductor Companies”):

<b>Integrated Circuits</b>	Includes activities of companies engaged in the development of a circuit of transistors, resistors and condensers installed on a single semiconductor wafer or chip. The components of a circuit are interconnected to perform a specified purpose.
<b>Semiconductors</b>	Includes activities of companies engaged in the production and assembly of semiconductors and related equipment.
<b>Semiconductor Technology</b>	Includes activities of companies engaged in providing a range of semiconductor solutions including, but not limited to, architecture, high-speed physical and digital controller interface intellectual property (“IP”) cores, security IP cores and IP protocols, and memory interface chips.
<b>Semiconductor Testing</b>	Includes activities of companies engaged in providing various semiconductor testing and measurement solutions to semiconductor companies.
<b>Semiconductor Material Supplier</b>	Includes activities of companies engaged in providing consumable materials to semiconductor manufacturers.

At the time of each semi-annual rebalance and reconstitution of the Index, Index constituents must meet investibility requirements, including:

- a market capitalization of at least \$200 million (\$160 million for current Index constituents) but less than \$5 billion;
- a 6-month average daily value traded greater than or equal to \$2 million (\$1.4 million for current Index constituents);
- having been traded on 90% of the eligible trading days in the last 6 months (3 months for recent initial public offerings without a 6-month history);
- a free float (i.e., the proportion of shares that are publicly available) of at least 10%; and
- a trading price of not greater than \$10,000.

The Index is rebalanced and reconstituted semi-annually, effective after the close of trading on the last trading day of each June and December (the “Rebalance Date”). For each rebalance and reconstitution of the Index, Index constituents are determined based on data as of the nearest Friday falling at least one month before such Rebalance Date (the “Selection Date”), and weights are calculated based on market capitalizations as of the sixth trading day prior to such Rebalance Date. As of each Rebalance Date, each constituent is market capitalization-weighted, subject to a maximum 8% and minimum 0.3% weight for each constituent.

As of June 30, 2020, the Index was composed of 29 constituents. The Index was established in 2020 and is owned and maintained by Indxx, LLC (the “Index Provider”). The Index Provider partnered with the Fund’s investment adviser to co-develop the methodology used to determine the securities included in the Index.

### *The Fund’s Investment Strategy*

Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in junior Semiconductor Companies. For purposes of the foregoing policy, the Fund defines “junior” companies to mean companies with a market capitalization of less than \$5 billion as of the most recent rebalance or reconstitution of the Fund’s Index. Additionally, the Fund defines “Semiconductor Companies” to be companies that were Semiconductor Companies as of the Selection Date prior to the most recent rebalance or reconstitution of the Index. The foregoing policy may be changed without shareholder approval upon 60 days’ written notice to shareholders.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning the Fund will generally invest in all of the component securities of the Index in the same approximate proportions as in the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole, when the Fund’s sub-adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

To the extent the Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index. The Index is expected to be concentrated in companies in the group of Electronic Production Equipment and Semiconductors industries.

The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund.

### **Principal Investment Risks**

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Funds.”

- **Concentration in Semiconductor Companies Risk.** The Fund’s investments will be concentrated in an industry or group of industries to the extent that the Index is so concentrated. In such event, the value of the Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries. The Index is expected to be concentrated in Semiconductor Companies. Semiconductor Companies are subject to the cyclical nature of the semiconductor and semiconductor equipment industry, so securities may fluctuate significantly and rapidly in price. In addition, the companies in the semiconductor and semiconductor equipment industry are involved in activities that have effects on the revenues and operating results of the companies. These activities include the risks of rapid obsolescence of products; substantial capital equipment expenditures; improper functioning of internal processes and information technology systems; changes in industry standards or regulations; inability to meet customer demand; unreliability of manufacturers and subcontractors to manufacture, assemble, and test companies’ products; and disruptions in companies’ activities such as acquisitions, divestures, strategic investments and

partnerships. The research and development efforts of these companies are focused on a limited number of new technologies and products. Any delay in the development or discontinuation of these technologies or products by companies in the industry, or their failure to achieve market acceptance, may compromise the competitive position of companies. These companies depend on intellectual property rights and may be adversely affected by loss or impairment of these rights.

- **Equity Market Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. For example, the global pandemic caused by COVID-19, a novel coronavirus, and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, has had negative impacts, and in many cases severe impacts, on markets worldwide. The COVID-19 pandemic has caused prolonged disruptions to the normal business operations of companies around the world and the impact of such disruptions is hard to predict. Such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Such events could adversely affect the prices and liquidity of the Fund’s portfolio securities or other instruments and could result in disruptions in the trading markets.
- **ETF Risks.** The Fund is an ETF, and, as a result of an ETF’s structure, it is exposed to the following risks:
  - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
  - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
  - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
  - *Trading.* Although Shares are listed for trading on NYSE Arca, Inc. (the “Exchange”) and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Index Provider Risk.** There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, maintained, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Adviser relies upon the Index Provider and its agents to compile, determine, maintain, construct, reconstitute, rebalance, compose, calculate (or arrange for an agent to calculate), and disseminate the Index accurately. Any losses or costs associated with errors made by the Index Provider or its agents generally will be borne by the Fund and its shareholders.
- **Market Capitalization Risk**
  - *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
  - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some mid-capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.

- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund’s performance.
- **Passive Investment Risk.** The Fund is not actively managed, and its sub-adviser would not sell a security held by the Fund due to current or projected underperformance of the security, industry, or sector, unless that security is removed from the Index or the selling of that security is otherwise required upon a reconstitution or rebalancing of the Index in accordance with the Index methodology.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

## Performance

Performance information for the Fund is not included because the Fund had not yet commenced operations as of the date of this Prospectus. In the future, performance information for the Fund will be presented in this section. Updated performance information will be available on the Fund’s website at [www.defianceetfs.com](http://www.defianceetfs.com).

## Portfolio Management

<b>Adviser</b>	Defiance ETFs, LLC
<b>Sub-Adviser</b>	Penserra Capital Management LLC (“Penserra” or the “Sub-Adviser”)
<b>Portfolio Managers</b>	Dustin Lewellyn, CFA, Managing Director of Penserra; Ernesto Tong, CFA, Managing Director of Penserra; and Anand Desai, Associate of Penserra have been portfolio managers of the Fund since its inception in 2020.

## Purchase and Sale of Shares

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Investors may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information about the Fund, including its NAV, market price, premiums and discounts, and bid-ask spreads is available on the Fund’s website at [www.defianceetfs.com](http://www.defianceetfs.com).

## Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

**Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

## Defiance Next Gen SPAC Derived ETF

### Investment Objective

The Defiance Next Gen SPAC Derived ETF (the “Fund” or the “SPAC ETF”) seeks to track the total return performance, before fees and expenses, of the Indxx SPAC & NextGen IPO Index (the “Index”).

### Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold, and sell shares of the Fund (“Shares”). This table and the Example below do not include the brokerage commissions and other fees to financial intermediaries that investors may pay on their purchases and sales of Shares.

<b>Annual Fund Operating Expenses</b> ( <i>expenses that you pay each year as a percentage of the value of your investment</i> )	
Management Fees	0.45%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses*	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.45%</b>

\* Estimated for the current fiscal year.

### Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>
\$46	\$144

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

### Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to track the total return performance, before fees and expenses, of the Index.

#### *Indxx SPAC & NextGen IPO Index*

The Index tracks the performance of the U.S.-listed common stock of Special Purpose Acquisitions Corporations (“SPACs”) and companies derived from SPACs. SPACs (also known as “blank check companies”) are companies with no commercial operations that are established solely to raise capital from investors for the purpose of acquiring one or more operating businesses (i.e., a SPAC-derived company). To be eligible to be added to the Index, a security must be U.S.-listed, have a minimum total market capitalization of \$250 million, have a free float (i.e., the proportion of shares that are publicly available) of at least 10%; have a trading price of less than \$10,000; and meet minimum liquidity thresholds. To be eligible to be added to the Index, SPACs must have traded on 90% of the eligible trading days in the last 3 months and SPAC-derived companies must be actively trading.

As of each reconstitution and rebalance of the Index, 80% of the weight of the Index will be allocated to SPAC-derived companies and 20% will be allocated to SPACs. Within each such category, constituents will be weighted based on their market capitalization, subject to a maximum 12% weight and minimum 0.5% weight for an individual constituent. Additionally, the aggregate weight for securities with a weight greater than 5% is limited to 45% at the time of each reconstitution and rebalance of the Index.

The Index is reconstituted and rebalanced annually after the close of business on the last trading day of each July, although new SPACs and SPAC-derived companies that meet the Index’s eligibility requirements may be added on a “fast-entry basis” in between reconstitution dates. In addition to the annual reconstitution in July, new SPACs may be added to the Index on the last trading day of each January, April, and October and new SPAC-derived companies may be added to the Index on the last trading day of each month. Index constituents will remain part of the Index indefinitely until they fail to meet the eligibility requirements.

As of September 22, 2020, the Index was composed of 35 constituents. The Index was established in 2020 and is owned and maintained by Indxx, LLC (the “Index Provider”). The Index Provider partnered with the Fund’s investment adviser to co-develop the methodology used to determine the securities included in the Index.

### *The Fund’s Investment Strategy*

Under normal circumstances, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in SPACs and SPAC-derived companies. The foregoing policy may be changed without shareholder approval upon 60 days’ written notice to shareholders.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning the Fund will generally invest in all of the component securities of the Index in the same approximate proportions as in the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole, when the Fund’s sub-adviser believes it is in the best interests of the Fund (*e.g.*, when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

To the extent the Index concentrates (*i.e.*, holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index.

The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund.

### **Principal Investment Risks**

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Funds.”

- **Associated Risks of Investments in SPACs.** The Fund invests in equity securities of SPACs, which raise assets to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. Because SPACs have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity’s management to identify and complete a profitable acquisition. There is no guarantee that the SPACs in which the Fund invests will complete an acquisition or that any acquisitions that are completed will be profitable. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices.
- **Associated Risks of SPAC-Derived Companies.** The Fund invests in companies that are derived from a SPAC. These companies may be unseasoned and lack a trading history, a track record of reporting to investors, and widely available research coverage. SPAC-derived companies are thus often subject to extreme price volatility and speculative trading. These stocks may have above-average price appreciation in connection with a potential business combination with a SPAC prior to inclusion in the Index. The price of stocks included in the Index may not continue to appreciate and the performance of these stocks may not replicate the performance exhibited in the past. In addition, SPAC-derived companies may share similar illiquidity risks of private equity and venture capital. The free float shares held by the public in a SPAC-derived company are typically a small percentage of the market capitalization. The ownership of many SPAC-derived companies often includes large holdings by venture capital and private equity investors who seek to sell their shares in the public market in the months following a business combination transaction when shares restricted by lock-up are released, causing greater volatility and possible downward pressure during the time that locked-up shares are released.
- **Concentration Risk.** The Fund’s investments will be concentrated in an industry or group of industries to the extent that the Index is so concentrated. In such event, the value of the Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries.
- **Equity Market Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to

receive payment from issuers. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on the Fund and its investments. For example, the global pandemic caused by COVID-19, a novel coronavirus, and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, has had negative impacts, and in many cases severe impacts, on markets worldwide. The COVID-19 pandemic has caused prolonged disruptions to the normal business operations of companies around the world and the impact of such disruptions is hard to predict. Such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Such events could adversely affect the prices and liquidity of the Fund's portfolio securities or other instruments and could result in disruptions in the trading markets.

- **ETF Risks.** The Fund is an ETF, and, as a result of an ETF's structure, it is exposed to the following risks:
  - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
  - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
  - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
  - *Trading.* Although Shares are listed for trading on NYSE Arca, Inc. (the "Exchange") and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Index Provider Risk.** There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, maintained, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Adviser relies upon the Index Provider and its agents to compile, determine, maintain, construct, reconstitute, rebalance, compose, calculate (or arrange for an agent to calculate), and disseminate the Index accurately. Any losses or costs associated with errors made by the Index Provider or its agents generally will be borne by the Fund and its shareholders.
- **Market Capitalization Risk**
  - *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
  - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some mid-capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.
  - *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

- **New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund’s performance.
- **Passive Investment Risk.** The Fund is not actively managed, and its sub-adviser would not sell a security held by the Fund due to current or projected underperformance of the security, industry, or sector, unless that security is removed from the Index or the selling of that security is otherwise required upon a reconstitution or rebalancing of the Index in accordance with the Index methodology.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

## Performance

Performance information for the Fund is not included because the Fund had not yet commenced operations as of the date of this Prospectus. In the future, performance information for the Fund will be presented in this section. Updated performance information will be available on the Fund’s website at [www.defianceetfs.com](http://www.defianceetfs.com).

## Portfolio Management

<b>Adviser</b>	Defiance ETFs, LLC
<b>Sub-Adviser</b>	Penserra Capital Management LLC (“Penserra” or the “Sub-Adviser”)
<b>Portfolio Managers</b>	Dustin Lewellyn, CFA, Managing Director of Penserra; Ernesto Tong, CFA, Managing Director of Penserra; and Anand Desai, Associate of Penserra have been portfolio managers of the Fund since its inception in 2020.

## Purchase and Sale of Shares

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Investors may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”). Recent information about the Fund, including its NAV, market price, premiums and discounts, and bid-ask spreads is available on the Fund’s website at [www.defianceetfs.com](http://www.defianceetfs.com).

## Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

## Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Fund’s investment adviser, sub-adviser or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

## ADDITIONAL INFORMATION ABOUT THE FUNDS

### Investment Objectives

Each Fund's (together, the "Funds") investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon written notice to shareholders.

### Principal Investment Risks

This section provides additional information regarding the principal risks described in each Fund Summary above. As in each Fund Summary, the principal risks below are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk described below is considered a "principal risk" of investing in the applicable Fund, regardless of the order in which it appears. Each of the factors below could have a negative impact on the applicable Fund's performance and trading prices.

- **Associated Risks of Investments in SPACs** (*SPAC ETF only*). The Fund invests in equity securities of SPACs, which raise assets to seek potential acquisition opportunities. Unless and until an acquisition is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. If an acquisition that meets the requirements for the SPAC is not completed within a pre-established period of time (e.g., two years), the invested funds are returned to the entity's shareholders. Because SPACs have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. There is no guarantee that the SPACs in which the Fund invests will complete an acquisition or that any acquisitions that are completed will be profitable. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices. SPACs may also encounter intense competition from other entities having a similar business objective, such as private investors or investment vehicles and other SPACs, competing for the same acquisition opportunities, which could make completing an attractive business combination more difficult.
- **Associated Risks of SPAC-Derived Companies** (*SPAC ETF only*). The Fund invests in companies that are derived from a SPAC. These companies may be unseasoned and lack a trading history, a track record of reporting to investors, and widely available research coverage. SPAC-derived companies are thus often subject to extreme price volatility and speculative trading. These stocks may have above-average price appreciation in connection with a potential business combination with a SPAC prior to inclusion in the Index. The price of stocks included in the Index may not continue to appreciate and the performance of these stocks may not replicate the performance exhibited in the past. In addition, SPAC-derived companies may share similar illiquidity risks of private equity and venture capital. The free float shares held by the public in a SPAC-derived company are typically a small percentage of the market capitalization. The ownership of many SPAC-derived companies often includes large holdings by venture capital and private equity investors who seek to sell their shares in the public market in the months following a business combination transaction when shares restricted by lock-up are released, causing greater volatility and possible downward pressure during the time that locked-up shares are released.
- **Concentration Risk** (*SPAC ETF only*). The Fund's investments will be concentrated in an industry or group of industries to the extent that the Index is so concentrated. In such event, the value of the Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries.
- **Concentration in Semiconductor Companies Risk** (*Semiconductor ETF only*). The Fund's investments will be concentrated in an industry or group of industries to the extent that the Index is so concentrated. In such event, the value of the Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries. The Index is expected to be concentrated in Semiconductor Companies. Semiconductor Companies are subject to the cyclical nature of the semiconductor and semiconductor equipment industry, so securities may fluctuate significantly and rapidly in price. In addition, the companies in the semiconductor and semiconductor equipment industry are involved in activities that have effects on the revenues and operating results of the companies. These activities include the risks of rapid obsolescence of products; substantial capital equipment expenditures; improper functioning of internal processes and information technology systems; changes in industry standards or regulations; inability to meet customer demand; unreliability on manufacturers and subcontractors to manufacture, assemble, and test companies' products; and disruptions in companies' activities such as acquisitions, divestures, strategic investments and partnerships. The research and development efforts of these companies are focused on a limited number of new technologies and products. Any delay in the development or discontinuation of these technologies or products by companies in the industry, or their failure to achieve market acceptance, may compromise the competitive position of companies. These companies depend on intellectual property rights and may be adversely affected by loss or impairment of these rights.
- **Equity Market Risk.** Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest

rates; economic expansion or contraction; and global or regional political, economic and banking crises. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer because common stockholders, or holders of equivalent interests, generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders, and other creditors of such issuers.

Beginning in the first quarter of 2020, financial markets in the United States and around the world experienced extreme and in many cases unprecedented volatility and severe losses due to the global pandemic caused by COVID-19, a novel coronavirus. The pandemic has resulted in a wide range of social and economic disruptions, including closed borders, voluntary or compelled quarantines of large populations, stressed healthcare systems, reduced or prohibited domestic or international travel, supply chain disruptions, and so-called “stay-at-home” orders throughout much of the United States and many other countries. The fall-out from these disruptions has included the rapid closure of businesses deemed “non-essential” by federal, state, or local governments and rapidly increasing unemployment, as well as greatly reduced liquidity for certain instruments at times. Some sectors of the economy and individual issuers have experienced particularly large losses. Such disruptions may continue for an extended period of time or reoccur in the future to a similar or greater extent. In response, the U.S. government and the Federal Reserve have taken extraordinary actions to support the domestic economy and financial markets, resulting in very low interest rates and in some cases negative yields. It is unknown how long circumstances related to the pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.

- **ETF Risks.** The Fund is an ETF, and, as a result of an ETF’s structure, it is exposed to the following risks:
  - *APs, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
  - *Costs of Buying or Selling Shares.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid-ask spread.” The bid-ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund, and/or increased market volatility may cause increased bid-ask spreads. Due to the costs of buying or selling Shares, including bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
  - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
  - *Trading.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500<sup>®</sup> Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Index Provider Risk.** There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, maintained, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Adviser relies upon the Index Provider and its agents to compile, determine, maintain, construct,

reconstitute, rebalance, compose, calculate (or arrange for an agent to calculate), and disseminate the Index accurately. Any losses or costs associated with errors made by the Index Provider or its agents generally will be borne by the Fund and its shareholders. To correct any such error, the Index Provider or its agents may carry out an unscheduled rebalance of the Index or other modification of Index constituents or weightings. When the Fund in turn rebalances its portfolio, any transaction costs and market exposure arising from such portfolio rebalancing will be borne by the Fund and its shareholders. Unscheduled rebalances also expose the Fund to additional tracking error risk. Errors in respect of the quality, accuracy, and completeness of the data used to compile the Index may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, particularly where the Index is less commonly used as a benchmark by funds or advisors. For example, during a period where the Index contains incorrect constituents, the Fund tracking the Index would have market exposure to such constituents and would be underexposed to the Index's other constituents. Such errors may negatively impact the Fund and its shareholders. The Index Provider and its agents rely on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund nor the Adviser can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included issuers.

- **Market Capitalization Risk**

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
  - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some mid-capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.
  - *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **New Fund Risk.** Each Fund is a recently organized investment company with a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision.
  - **Non-Diversification Risk.** Each Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, a Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase a Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on such Fund's performance.
  - **Passive Investment Risk.** Each Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. Each Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, a Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. The returns from the types of securities in which a Fund invests may underperform returns from the various general securities markets or different asset classes. This may cause a Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities (for example, large-, mid- and small-capitalization stocks) tend to go through cycles of doing better – or worse – than the general securities markets. In the past, these periods have lasted for as long as several years.
  - **Tracking Error Risk.** As with all index funds, the performance of each Fund and its respective Index may differ from each other for a variety of reasons. For example, the Funds incur operating expenses and portfolio transaction costs not incurred by an Index. In addition, the Funds may not be fully invested in the securities of their respective Index at all times or may hold securities not included in the Index. A Fund may use a representative sampling strategy to achieve its investment objective, if the Fund's Sub-Adviser believes it is in the best interest of the Fund, which generally can be expected to produce a greater non-correlation risk.

## PORTFOLIO HOLDINGS INFORMATION

Information about each Fund's daily portfolio holdings is available at [www.defianceetfs.com](http://www.defianceetfs.com). A complete description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio holdings is available in the Funds' Statement of Additional Information ("SAI").

## MANAGEMENT

### Investment Adviser

Defiance ETFs, LLC serves as the investment adviser and has overall responsibility for the general management and administration of the Funds. The Adviser is located at 311 W. 43rd Street, 12th Floor, New York, New York 10036, and is an SEC-registered investment adviser. The Adviser was founded in 2018 and arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Funds to operate. The Adviser provides investment advisory services to ETFs, including the Funds.

The Adviser provides oversight of the Funds' Sub-Adviser, monitoring of the Sub-Adviser's buying and selling of securities for the Funds, and review of the Sub-Adviser's performance.

For the services it provides to the Funds, each Fund pays the Adviser a unified management fee, which is calculated daily and paid monthly, at an annual rate based on the applicable Fund's average daily net assets as set forth in the table below.

Name of Fund	Management Fee
Defiance Indxx Junior Semiconductor ETF	0.45%
Defiance Next Gen SPAC Derived ETF	0.45%

Under the Investment Advisory Agreement (the "Advisory Agreement"), the Adviser has agreed to pay all expenses of the Funds, except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Funds under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and the unified management fee payable to the Adviser. The Adviser, in turn, compensates the Sub-Adviser from the management fee it receives.

The basis for the Board of Trustees' approval of the Advisory Agreement for the Funds will be available in the Funds' first Semi-Annual or Annual Report to Shareholders.

### Sub-Adviser

The Adviser has retained Penserra Capital Management, LLC to serve as sub-adviser for the Funds. The Sub-Adviser is responsible for the day-to-day management of the Funds. The Sub-Adviser is a registered investment adviser and New York limited liability company whose principal office is located at 4 Orinda Way, Suite 100-A, Orinda, California 94563. The Sub-Adviser provides investment management services to investment companies and other investment advisers. The Sub-Adviser is responsible for trading portfolio securities for the Funds, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the Index, subject to the supervision of the Adviser and the Board.

For its services, the Sub-Adviser is paid a fee by the Adviser, which fee is calculated daily and paid monthly, at an annual rate based on the aggregate average daily net assets for each fund advised by the Adviser, including the Funds, and for which the Sub-Adviser serves as sub-adviser, as follows: 0.05% on the first \$500 million in aggregate net assets; 0.04% on the next \$500 million in aggregate net assets; 0.03% on the next \$1 billion in aggregate net assets; and 0.02% on aggregate net assets in excess of \$2 billion, subject to a minimum annual fee of \$20,000 for the first fund and \$15,000 for each additional fund.

The basis for the Board of Trustees' approval of the Sub-Advisory Agreement for the Funds will be available in the Funds' first Semi-Annual or Annual Report to Shareholders.

### Portfolio Managers

The Funds are managed by Penserra's portfolio management team. The individual members of the team responsible for the day to day management of the Funds' portfolios are listed below.

Dustin Lewellyn, CFA, Managing Director of the Sub-Adviser, Ernesto Tong, CFA, Managing Director of the Sub-Adviser and Anand Desai, Associate of the Sub-Adviser, are the Funds' portfolio managers (the "Portfolio Managers") and are jointly responsible for the day to day management of the Funds. The Portfolio Managers are responsible for various functions related to portfolio management, including, but not limited to, investing cash inflows, implementing investment strategy, researching and reviewing investment strategy, and overseeing members of their portfolio management team with more limited responsibilities.

Mr. Lewellyn has been a Managing Director with the Sub-Adviser since 2012. He was President and Founder of Golden Gate Investment Consulting LLC from 2011 through 2015. Prior to that, Mr. Lewellyn was a managing director at Charles Schwab Investment Management, Inc. ("CSIM"), which he joined in 2009, and head of portfolio management for Schwab ETFs. Prior to joining CSIM, he worked for two years as director of ETF product management and development at a major financial institution focused on asset and wealth management. Prior to that, he was a portfolio manager for institutional clients at a financial services firm for three years. In addition, he held roles in portfolio accounting and portfolio management at a large asset management firm for more than 6 years.

Mr. Tong has been a Managing Director with the Sub-Adviser since 2015. Prior to joining Penserra, Mr. Tong spent seven years as a vice president at Blackrock, where he was a portfolio manager for a number of the iShares ETFs, and prior to that, he spent two years in the firm's index research group.

Mr. Desai has been an Associate with the Sub-Adviser since 2015. Prior to joining Penserra, Mr. Desai spent five years as a portfolio fund accountant at State Street.

The Funds' SAI provides additional information about the Portfolio Managers' compensation structure, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of shares in each Fund.

## **HOW TO BUY AND SELL SHARES**

Each Fund issues and redeems Shares at NAV only in Creation Units. Only APs may acquire Shares directly from a Fund, and only APs may tender their Shares for redemption directly to a Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares and receive less than NAV when you sell those Shares.

### **Book Entry**

Shares are held in book-entry form, which means that no stock certificates are issued. The DTC or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" through your brokerage account.

### **Frequent Purchases and Redemptions of Shares**

The Funds impose no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with a Fund, are an essential part of the ETF process and help keep Share trading prices in line with NAV. As such, the Funds accommodate frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Funds employ fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by a Fund in effecting trades. In addition, the Funds and the Adviser reserve the right to reject any purchase order at any time.

### **Determination of Net Asset Value**

Each Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern time, each day the NYSE is open for business. Each NAV for a Fund is calculated by dividing the applicable Fund's net assets by its Shares outstanding.

In calculating its NAV, each Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. In particular, each Fund generally values equity securities traded on any recognized U.S. or non-U.S. exchange at the last sale price or official closing price on the exchange or system on which they are principally traded. If such information is not available for a security held by a Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Board (as described below).

### **Fair Value Pricing**

The Board has adopted procedures and methodologies to fair value Fund securities whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading

market is closed during regular market hours; or (iv) a security's value is materially affected by events occurring after the close of the security's primary trading market. Generally, when fair valuing a security, the Funds will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Board-adopted valuation procedures. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser or Sub-Adviser will be able to obtain the fair value assigned to the security upon the sale of such security.

### **Delivery of Shareholder Documents – Householding**

Householding is an option available to certain investors of the Funds. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Funds is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

### **Investments by Registered Investment Companies**

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in a Fund beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to the Adviser, including that such investment companies enter into an agreement with a Fund.

## **DIVIDENDS, DISTRIBUTIONS, AND TAXES**

### **Dividends and Distributions**

Each Fund intends to pay out dividends, if any, and distribute any net realized capital gains to its shareholders at least annually. Each Fund will declare and pay capital gain distributions in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

### **Taxes**

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in a Fund. Your investment in a Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

Each Fund intends to elect and to qualify each year for treatment as a RIC. If a Fund meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, a Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when a Fund makes distributions, when you sell your Shares listed on the Exchange; and when you purchase or redeem Creation Units (institutional investors only).

### **Taxes on Distributions**

Each Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long a Fund owned the investments that generated them, rather than how long a shareholder has owned his or her Shares. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by a Fund for one year or less generally result in short-term capital gains and losses. Distributions of a Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by such Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates of up to 20% (lower rates apply to individuals in lower tax brackets). Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Funds as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Funds received in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S.

securities market. Dividends received by a Fund from a REIT may be treated as qualified dividend income generally only to the extent so reported by such REIT.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from a Fund.

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income,” which includes interest, dividends, and certain capital gains (generally including capital gains distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by a Fund before your investment (and thus were included in the Shares’ NAV when you purchased your Shares).

You may wish to avoid investing in a Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by a Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. A Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Each Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

#### **Taxes When Shares are Sold on the Exchange**

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. The ability to deduct capital losses may be limited.

#### **Taxes on Purchases and Redemptions of Creation Units**

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP’s aggregate basis in the securities delivered, plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP’s basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The Internal Revenue Service may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for an AP who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less.

Each Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. Such Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause such Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, such Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

*The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in each Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled “Federal Income Taxes” in the SAI.*

## **DISTRIBUTION**

The Distributor, Foreside Fund Services, LLC, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Funds on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Funds or the securities that are purchased or sold by the Funds. The Distributor's principal address is Three Canal Plaza, 3<sup>rd</sup> Floor, Portland, Maine 04101.

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, each Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Funds, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

## **PREMIUM/DISCOUNT INFORMATION**

Information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV per Share will be available, free of charge, on the Funds' website at [www.defianceetfs.com](http://www.defianceetfs.com).

## **ADDITIONAL NOTICES**

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange makes no representation or warranty, express or implied, to the owners of the Shares or any member of the public regarding the ability of the Funds to track the total return performance of their respective Index or the ability of the Indexes identified herein to track the performance of their constituent securities. The Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of the Indexes, nor in the determination of the timing of, prices of, or quantities of the Shares to be issued, nor in the determination or calculation of the equation by which the Shares are redeemable. The Exchange has no obligation or liability to owners of the Shares in connection with the administration, marketing, or trading of the Shares.

The Exchange does not guarantee the accuracy and/or the completeness of the Indexes or the data included therein. The Exchange makes no warranty, express or implied, as to results to be obtained by the Funds, owners of the Shares, or any other person or entity from the use of the Indexes or the data included therein. The Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Indexes or the data included therein. Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Adviser, the Index Provider, the Exchange, and each Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in a Fund particularly or the ability of an Index to track general stock market performance. The Index Provider has no obligation to take the needs of the Funds or the owners of Shares into consideration in determining, composing, or calculating an Index. The Index Provider is not responsible for, and has not participated in, the determination of the timing of, prices of, or quantities of Shares to be issued or in the determination or calculation of the equation by which Shares are redeemable. The Funds, the Adviser, and the Sub-Adviser do not guarantee the accuracy, completeness, or performance of an Index or the data included therein and shall have no liability in connection with the Index or Index calculation. The Index Calculation Agent maintains and calculates the Index used by each Fund. The Index Calculation Agent shall have no liability for any errors or omissions in calculating an Index.
